FULL STACK DEVELOPER

As a Full stack developer with 3 years of hands-on experience in Express.js, React.js, Node.js and Next.js, I specialize in building dynamic, scalable, and user-centric web applications. Passionate about crafting seamless user experiences, I thrive on tackling challenges and delivering innovative solutions. My goal is to contribute to cutting-edge projects, continuously refine my technical skills, and grow as a proficient full- stack developer.

TECHNOLOGIES KNOWN

- **Frontend** : HTML5, CSS3, Bootstrap, Reactjs, Next.js, Tailwindcss
 - **Backend** : Node js, Express.js, Next.js Python (core).
 - **Database** : MongoDB, PostgreSQL
 - **Tools & Platforms** : GitHub, GitBash, Postman
-

PROJECT EXPERIENCES

Independent Medical Examination (Medical Insurance Claim)

Jan 2024 - August 2025

This web application was developed to streamline the process of medical insurance claims for claimants. It served as a platform where claimants could submit their claims along with necessary documentation, such as medical reports and incident details. Doctors played a crucial role in the verification process, reviewing the submitted claims and validating the incidents to ensure their authenticity. Later we have changed this project into Next.js.

Technologies Used :

- React js, Node js, Express, HTML, CSS, Next.js, Bootstrap, Postman, PostgreSQL

Custom Textile Design (Customize Web Application)

Sepetemper 2023- January 2024

The Custom Design Textiles web application platform is a web-based application designed to cater to users looking for personalized textile products. The platform allows customers to design, customize, and purchase textile items, ranging from clothing to home decor fabrics.

Users can start with pre-designed templates or upload their own designs, enabling complete creative control. The system offers a dynamic design editor with features such as color selection, pattern adjustment, text addition, and image placement, providing a seamless user experience.

Technologies Used :

- React js, Node js, Express, HTML, CSS, Tailwind css, Postman, MongoDB

AI Medical Report Generation (Medical Insurance Claim)

August 2025 - Present

The AI Medical Report Generation system is a web-based platform designed to automate the creation of medical examination and insurance claim reports using advanced Large Language Model (LLM) and Hugging face transformer models. The application streamlines the process of converting raw clinical data, doctor's notes, and diagnostic inputs into structured, insurance-compliant medical reports.

Technologies Used :

- Next.js, Tailwind CSS, PostgreSQL, Postman, Gemini-2.5-flash-model, Hugging Face Transformer Models
-

COURSE COMPLETION

Full Stack Python with Angular :

Fita Academy - Madurai

Duration : 3 months

WORK EXPERIENCE

MERN Stack Developer

September 2023- Present

Xentrix Hi-tech Pvt Ltd, Coimbatore

- Developed and maintained scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js, delivering high-performance and SEO-optimized solutions for business operations.
 - Designed and implemented RESTful APIs using Node.js and Express.js, ensuring efficient client-server communication and scalable architecture.
 - Integrated React.js and Next.js components with dynamic data from REST APIs, enhancing user experience through responsive, server-side rendered (SSR) and interactive UI elements.
 - Worked extensively with MongoDB for database management, including schema design, data modeling, and query optimization to boost system performance.
 - Developed and integrated AI-driven features leveraging LLM (Large Language Model) APIs and frameworks to automate workflows, enhance user interaction, and enable intelligent data processing.
 - Ensured cross-browser compatibility and optimized front-end performance, achieving up to a 30% reduction in page load time through code optimization and efficient asset management.
-

EDUCATION

Bachelor of Science in Computer Science,

Singai sittal ayya arts and science college, A.Thekkur

Alagappa University, Karaikudi (Affiliated)

Graduation Year: 2023

CGPA: 8.20
